

**Note:** The Metro Range (UH02) Grooved Edge Hollow deck boards are currently only available in Western Australia. They have been installed in W.A. on residential sub-frames with **350mm joist centres** and performing well for many years.

This range is currently not distributed on the east coast due to the widely accepted building practice of installing decks on sub-frame joists of 400mm-450mm centres.

### Hollow – Metro Range

The circular hollow Metro Range are lightweight and easy to handle making them perfect for most residential new decking projects. Suited to subframes with joist spacings up to 350mm.

### Stocked Colours

Antique Silver Grey Ipe Teak

A common misconception about hollow boards is that they are inferior in strength. On the contrary, the arch structure of the void distributes pressure equal to the material absent from the core, giving them the same fortitude as a solid board.

The Grooved Hollow deck boards are finished with the US07 Square edged, solid board around the perimeter, as picture-framing or breaker boards. 15mm thick solid fascia boards (US06) are also available for finishing.

The Metro UH02 Grooved Hollow Deck Board uses **hidden fasteners**, while the associate **US07 solid square edge** boards use composite top-fixed screws for installation.

**Metro (Hollow) deck joist span is 350mm max.**

UH02 (Metro)  
Grooved Hollow Deck Board  
138mm x 23mm

US07 solid straight edge (Metro)  
138mm x 23mm

US06 solid fascia board  
138mm x 15mm
